

GEORGE BINSAR M. T. SITORUS

+6285163162918 | georgebinsar45@gmail.com | linkedin.com/in/georgebinsr/ | georgepach.github.io/portofolioGeorge/

Aspiring Software Engineer passionate about building impactful digital solutions and continuous learning. I have hands-on experience applying technologies like Laravel, React.js, C, Python, HTML, CSS, SQL to build both frontend and backend solutions. A collaborative problem-solver who thrives in team environments and is committed to growing technical expertise through real-world projects

Highlighted Skills

Technical Skills	: Laravel, React, Git, Figma, C, C#, Python, ASP.Net, Python, SQL, Java, HTML, CSS.
Soft Skills	: Agile, Leadership, Collaboration, Teamwork, Communication, Adaptability, Mentorship , Analytical Thinking, Problem-Solving

Education

Bina Nusantara University – DKI Jakarta, Jakarta Barat	(August 2023 – Present)
- Bachelor of Computer Science, 3.42/4.00 - Relevant Coursework : Software Engineer, Agile Software Development, Code Reengineering, Pattern Software Design	

Organization & Other Experiences

Beelingua Mentor – Jakarta	(April 2025 – Present)
Binus University	
- Selected as 1 of 50 mentees from hundreds of applicants for the Beelingua mentorship program. - Guided 50–60 peers on their Beelingua learning journey through one-on-one tutoring and group discussions.	
Liaison Officer – Jakarta	(October 2025 – Present)
BIFest Beelingua Olympiad 2025	
- Coordinating participants & staff as Liaison Officer and ensuring smooth competition logistics. - Guided debaters from the main hall to their assigned debating rooms, providing direction and maintaining schedule efficiency.	
Project Support – Jakarta	(May 2025 – August 2025)
Do Well Do Good Future Leaders - BINUS Chapter	
- Researched marketing challenges for LindungiHutan using an Issue Tree framework and co-developed strategies with clients. - Created a strategic timeline and roadmap, strengthening expertise in consulting, digital marketing analysis, and collaborative problem solving	
Staff of Media Partner BTT 1 – Jakarta	(December 2023 – January 2024)
Bina Nusantara Computer Club	
Secured 17 strategic partnerships by identifying potential collaborators, reaching out to stakeholders, and negotiating agreements that supported the event’s visibility and impact.	
Activist – Jakarta	(November 2023 – September 2024)
Bina Nusantara Computer Club	
- Completed Front-end & Back-End Development coursework within BNCC tech divisions. - Executed a website development project applying Laravel skills learned in coursework.	

Projects

Web Based Platform (GreenLoop)	(April 2025 – June 2025)
Project Manager	
- Full-stack development using Laravel (PHP) and React.js, implementing features like the order system, activities page, and homepage components. - Led project management (Agile, daily scrums) for a waste exchange web platform built for a Software Engineering course.	
Smart Traffic Management System (STMS)	(December 2024 – February 2025)
Tech Lead	
- Developed a vehicle detection model using YOLOv5 and Python to dynamically prioritize traffic signal timing, successfully reducing simulated congestion. - Served as Tech Lead & AI Developer, designing and implementing an AI-driven traffic optimization system for an AI course project.	

Marketplace Platform (ThriftCorner)

(September 2025 – October 2025)

Full-Stack

- Built core features for a Laravel & Tailwind CSS student marketplace, including secure user authentication and the news portal.
- Contributed to overall project success through involvement in UI/UX design, frontend implementation, and backend development.

Achievements

The 10th International Conference on Computer Science and Computational Intelligence 2025

(July 2025 – August 2025)

- Author & Presenter of paper “Bridging the Gap: A Comparative Evaluation of Agile, Waterfall, and Hybrid Methodologies in Modern Software Project” at the 10th International Conference on Computer Science and Computational Intelligence (ICCSCI 2025)

Finalist - UI/UX Competition Business and System Innovation Challenge (BASIC) 2024

(January 2024)

- Led Team “Joy” in the UI/UX Competition (Business and System Innovation Challenge 2024), managing collaboration and overseeing design and user flow to deliver a user-centered, creative, and functional solution.
